RISKS

6.1 By entering the Moms Avenue pre-ICO you acknowledge that you understand that Digital Assets, MOM, blockchain technology, Ethereum, Ether, Bitcoin and other associated and related technologies are new and untested and outside of Company's control and adverse changes in market forces or the technology, broadly construed, will excuse Company's performance under this agreement.

6.2 In addition to the above, you also acknowledge that you have been warned of the following risks, associated with the Website, the Digital Assets, the MOMs, Moms Avenue Service and Protocol and other relevant technologies mentioned herein.

(a) Legal risks regarding securities regulations. There is a risk that in some jurisdictions the MOMs and other Digital Assets might be considered to be a security, or that it might be considered to be a security in the future. The Company does not give warranties or guarantees that MOM tokens are not a security in all jurisdictions. Each user of MOM tokens shall bear its own legal or financial consequences of MOM tokens being

considered a security in their respective jurisdiction. Every user is bound to check if acquisition and disposal of MOM tokens is legal in its jurisdiction, and by accepting these Terms each user undertakes not to use MOM tokens should their use not be legal in the relevant jurisdiction. Acquiring cryptographic tokens in possession and exchanging them for other cryptographic tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of Moms Avenue to provide MOM tokens in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree certainty that MOM tokens are not legal in certain jurisdiction, the Company will either a) cease operations in that jurisdiction, or b) adjust MOM tokens in a way to comply with the regulation should that be possible and viable.

(b) Risks associated with Ethereum. MOM tokens are based on Ethereum. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause the MOM tokens to malfunction or function in an unexpected or unintended manner. Ether, the native unit of account of the Ethereum may itself lose value in ways similar to MOM tokens, and also other ways. More information about the Ethereum is available at <http://www.ethereum.org>

(c) Risk of unfavourable regulatory action in one or more jurisdictions. Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Ethereum network and associated blockchain networks and Digital Assets and MOM tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital tokens like MOM tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.

(d) Risk of theft and hacking Hackers or other groups or organizations may attempt to interfere with your Third-party Wallet, the Website or the availability of MOM tokens and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks.

(e) Risk of security weaknesses in the Website and MOM tokens source code or any associated software and/or infrastructure There is a risk that the Website and MOM tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of MOM tokens.

(f) Risk of weaknesses or exploitable breakthroughs in the field of cryptography Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum, MOM tokens, Moms Avenue Service and Protocol, which could result in the theft or loss of MOM tokens.

(g) Risk of mining attacks. As with other decentralized cryptocurrencies, the Ethereum blockchain, which is used for the MOM tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, “selfishmining” attacks, and race condition attacks. Any successful attacks present a risk to

the MOM tokens, expected proper execution and sequencing of MOM tokens, and expected proper execution and sequencing of Ethereum contract computations in general. Despite the efforts of Moms Avenue and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining Attacks, as described above, may also target other blockchain networks, with which the MOM tokens interact with and consequently the MOM tokens may be impacted also in that way to the extent, described above.

(h) Risk of low or no liquidity. Even though there are currently online services available, which enable possibility of exchange of cryptographic tokens between themselves, and also, some of them enable exchange of cryptographic tokens for fiat money, there are no warranties and/or guarantees given that MOM tokens will be listed or made available for exchange for other cryptographic tokens and/or fiat money, and no guarantees are given whatsoever with the capacity (volume) of such potential exchange. It shall be explicitly cautioned, that such exchange, if any, might be subject to poorly understood regulatory oversight, and the Company does not give any warranties in regard to any exchange services providers. Users might be exposed to fraud and failure. In any case, the Company will not enable exchange of MOM tokens for other cryptographic tokens or for fiat currency. User may not at any given time be able to acquire or dispose of its MOM tokens due to lack of liquidity.

(i) Risk of loss of value Value of MOM tokens may fluctuate and their users might suffer loss in value of such acquired tokens. There might be different reasons that would cause unfavourable fluctuations of the value of the MOM tokens.

(j) Risk of uninsured losses MOM tokens are unlike bank accounts or accounts at some other financial institutions entirely uninsured.

(k) Risk of malfunction in the Ethereum network or any other blockchain. It is possible that the Ethereum network or any other network, to which the MOM tokens are interacting with, malfunctions in an unfavourable way, including but not limited to one that results in the loss of MOM tokens

(l) Internet transmission risks. You acknowledge that there are risks associated with using the MOM tokens including, but not limited to, the failure of hardware, software, and Internet connections. You acknowledge that the Company shall not be responsible for any communication failures, disruptions, errors, distortions or delays you may experience when using the Website and MOM tokens, howsoever caused.

(m) Unanticipated risks. Cryptocurrencies and blockchains are new and untested technology. In addition to the risks set forth here, there are risks that Moms Avenue cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

(n) Insufficient interest in Moms Avenue Service, Protocol and MOM tokens. It is possible that MOM or Moms Avenue Service and Protocol will not be used by a large number of

individuals, businesses and other organisations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of Moms Avenue Service or Protocol.

(o) MOM, as developed, may not meet your expectations. Moms Avenue Service and Protocol is currently under development and may undergo significant changes before release. Your expectations regarding the form and functionality of the Moms Avenue Service and Protocol and MOM tokens may not be met upon release of new Website, deployment of Moms Avenue Service and Protocol, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of MOM.

(p) Moms Avenue Service and Protocol may never be completed or released. Moms Avenue Service and Protocol (the Project), described in section 3, may never be released and operational, even though Moms Avenue will make reasonable efforts to complete and deploy it.

6.3 MOM tokens are provided “as is”. We and our affiliates and licensors make no representations or warranties of any kind, whether express, implied, statutory or otherwise regarding the MOM tokens, including any warranty that the MOM tokens will be uninterrupted, error free or free of harmful components, secure or not otherwise lost or damaged. Except to the extent prohibited by law, we and our affiliates and licensors disclaim all warranties, including any implied warranties of merchantability, satisfactory quality, fitness for a particular purpose, noninfringement, or quiet enjoyment, and any warranties arising out of any course of dealing or usage of trade.

The Company consequently explicitly prohibits persons from paragraph 7.1. from using the MOM tokens. The Company shall not be held liable for any legal or monetary consequence arising of such use.
